

AM
Concl

further n cycles, wherein the distances between adjacent switching edges [can be derived] are derivable from the inverted random numbers instead of from the random numbers.

R E M A R K S

This amendment is being made simultaneously with filing this application. The specification and claims have been amended in accordance with USA practice under 35 USC 112 and to eliminate multiple-dependent form claims. No multiple-dependent claims exist as of the filing date.

No multiple-dependent form claims exist in this application.

Please enter this Preliminary Amendment prior to calculating the claim filing fee and prior to an action on the merits, which is respectfully requested.

Respectfully submitted,

Dr. Frank Sattler, et al
